

Nguyen Van An

AI Engineer

an.nguyen.aieng@gmail.com | +84 908 123 456 | Ho Chi Minh City, Vietnam | linkedin.com/in/annguyen-ai | github.com/annguyen-ai

SUMMARY

Recent Computer Science graduate with a strong foundation in machine learning and deep learning, gained through coursework, a research thesis, and a hands-on internship building NLP and computer vision prototypes. Comfortable with Python, PyTorch, and common ML tooling; eager to apply and grow these skills on real production AI systems.

SKILLS

Languages	Python, SQL, basic C++
ML / DL	scikit-learn, PyTorch, TensorFlow/Keras (coursework), Pandas, NumPy
NLP / CV basics	Hugging Face Transformers (fine-tuning), OpenCV, spaCy
Tools	Git, Jupyter, Docker (basic), Google Colab, Linux
Cloud	Basic exposure to Google Colab GPU, AWS Free Tier (S3, EC2 basics)
Other	REST API basics with FastAPI, SQL querying, data cleaning/EDA

EXPERIENCE

AI Engineer Intern — DataViet Solutions

Ho Chi Minh City, Vietnam | Feb 2025 – Jul 2025 (6 months)

- Built and fine-tuned a text-classification model (PhoBERT) for customer-feedback tagging, reaching 87% accuracy on an internal validation set.
- Assisted in cleaning and labeling a 15,000-row customer support dataset used for model training.
- Wrote a FastAPI wrapper to serve the trained model behind a REST endpoint for the product team to test.
- Documented experiments and results using MLflow under the guidance of a mentor engineer.

Research Assistant (Part-time) — University AI Lab

Ho Chi Minh City, Vietnam | Sep 2024 – Jan 2025

- Supported a lab project on lightweight image classification models for edge devices.
- Ran training experiments with different data-augmentation strategies and logged results for the research team.

PROJECTS

Vietnamese News Summarizer (Personal Project)

- Fine-tuned a mT5 model to generate short summaries of Vietnamese news articles; deployed a demo with Streamlit.
- Scraped and cleaned ~5,000 articles to build a small training dataset.

Fruit Freshness Classifier

- Trained a CNN (transfer learning on MobileNetV2) to classify fruit freshness from images; 91% test accuracy.
- Built a simple Flask web app for demoing predictions from uploaded photos.

EDUCATION

B.Sc. in Computer Science — University of Science, VNU-HCM

Sep 2021 – Jun 2025 | GPA: 3.4/4.0

- Thesis: "Fine-tuning Transformer Models for Vietnamese Text Summarization" (Advisor-supervised).
- Relevant coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Probability & Statistics.

CERTIFICATIONS

- DeepLearning.AI — Deep Learning Specialization (Coursera, 2024)
- Google — Introduction to Machine Learning (2024)
