

AI Engineer

BrightStack Technologies | Ho Chi Minh City, Vietnam (Hybrid) | Full-time

BrightStack Technologies is building AI-powered tools for e-commerce businesses across Southeast Asia. We're growing our AI team and looking for an AI Engineer to help design, train, and deploy machine learning models that power search, recommendations, and customer-facing chat features. This role is well suited to someone early in their AI engineering career who is eager to learn from a small, hands-on team and grow quickly through real production work.

WHAT YOU'LL DO

- Help build, train, and evaluate machine learning models (NLP and/or recommendation systems) under the guidance of senior team members.
- Clean, explore, and prepare datasets for model training, and help maintain data pipelines.
- Support the deployment of models into production services, including basic monitoring of model performance.
- Write clear documentation for experiments, model versions, and results.
- Collaborate with backend and product engineers to integrate AI features into the main product.
- Participate in code reviews and team knowledge-sharing sessions to continuously improve your skills.

WHAT WE'RE LOOKING FOR

- 0–1 year of hands-on experience with machine learning or deep learning (internships, research projects, or personal projects all count).
- Solid understanding of Python and common ML libraries such as PyTorch, TensorFlow, or scikit-learn.
- Basic understanding of core ML/DL concepts: supervised learning, neural networks, model evaluation metrics.
- Familiarity with SQL and comfortable working with structured and unstructured data.
- A portfolio of academic, personal, or internship projects you can walk us through (GitHub link welcome).
- Good communication skills in English and Vietnamese; comfortable asking questions and learning from feedback.
- A degree in Computer Science, Data Science, Mathematics, or a related field (or equivalent practical experience).

NICE TO HAVE

- Exposure to NLP libraries such as Hugging Face Transformers.
- Basic experience with cloud platforms (AWS, GCP, or Azure).
- Familiarity with Git, Docker, or basic MLOps concepts.
- Prior internship or co-op experience in a software or data team.

WHAT WE OFFER

- A structured onboarding plan and a mentor for your first 6 months.
- Hands-on exposure to real production ML systems from day one.
- Budget for online courses, books, and conference attendance.
- Competitive salary, health insurance, and hybrid working arrangement.
- A supportive, low-ego engineering culture that values curiosity and steady growth.

HOW TO APPLY

Please send your CV and, if available, a link to your GitHub or portfolio to careers@brightstack-tech.example with the subject line "AI Engineer Application". We review applications on a rolling basis.
