SUMMARY

AI Engineer with 3+ years of experience designing, training, and deploying machine learning models into production. Track record of shipping NLP and recommendation features used by hundreds of thousands of users, building reusable ML pipelines, and collaborating closely with product and backend teams to turn prototypes into reliable services.

SKILLS

Languages	Python, SQL, Bash
ML / DL	PyTorch, TensorFlow, scikit-learn, XGBoost, Optuna (hyperparameter tuning)
NLP	Hugging Face Transformers, PhoBERT, BERT fine-tuning, sentence embeddings, RAG pipelines
MLOps	MLflow, Docker, Kubernetes (basic), Airflow, CI/CD with GitHub Actions
Cloud	AWS (SageMaker, S3, Lambda, EC2), basic GCP Vertex AI
Data	Spark (PySpark), PostgreSQL, Redis, Feature Store concepts

EXPERIENCE

AI Engineer — Fintek Digital JSC

Ho Chi Minh City, Vietnam | Apr 2023 – Present (2+ years)

- Designed and deployed a transaction-risk scoring model (XGBoost) into production, reducing fraud losses by an estimated 18% in its first two quarters.
- Built a document-question-answering feature using a retrieval-augmented generation (RAG) pipeline over internal policy documents, cutting average support-ticket resolution time by 30%.
- Owned the model-serving layer (FastAPI + Docker on AWS ECS) and set up monitoring/alerting for data drift and latency using CloudWatch and custom dashboards.
- Mentored two incoming engineers on ML experimentation practices and code review standards.
- Collaborated with backend and product teams to define API contracts and rollout plans for new ML features (canary releases, A/B testing).

Machine Learning Engineer — CloudMinds Vietnam

Ho Chi Minh City, Vietnam | Jul 2021 – Mar 2023 (1 yr 9 months)

- Built a product-recommendation model (collaborative filtering + content-based hybrid) that lifted click-through rate by 12% in A/B testing.
- Migrated legacy batch-scoring pipelines to Airflow, reducing manual pipeline failures by roughly 40%.
- Implemented data-validation checks (Great Expectations) that caught upstream data-quality issues before they reached training jobs.

SELECTED PROJECTS

- Internal RAG chatbot template used across 3 product teams to prototype Q&A; features on their own documents.
- Open-source contribution: added a PhoBERT tokenizer fix accepted into a mid-size Vietnamese NLP toolkit repo.

EDUCATION

B.Sc. in Computer Science — Ho Chi Minh City University of Technology (Bach Khoa)

Sep 2017 – Jun 2021

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty (2024)
- DeepLearning.AI — Natural Language Processing Specialization (2022)
